MCP ACCESS · GUIDE

Your access to the UNIT 117 base — inside your AI.

What is in the base, the usage rules, **how to connect your licence** to ChatGPT or Claude and which requests to start with.

2,200
companies mapped

10,600+
product profiles

3
data layers

UNIT 117 × UKRAINIAN DUAL-USE TECHNOLOGY CLUSTER

You ask in plain words. The answer comes from a verified base.

MCP (Model Context Protocol) is an open standard that connects external data to an AI assistant. You ask in the chat, the assistant queries the UNIT 117 base itself and returns an answer **with data on companies, products and segments, and links to sources**.

01
Your question
in ChatGPT, Claude or Cursor

04
The answer
with sources, not the open web

> **“Find in UNIT 117 MCP Ukrainian C-UAS manufacturers with high TRL and show their products”**

A map of Ukrainian and European defence.

Data is selected, cleaned, categorised and linked. **The base grows every month.**

2,200

defence companies on the map — Ukraine 1,450+, Europe 700+

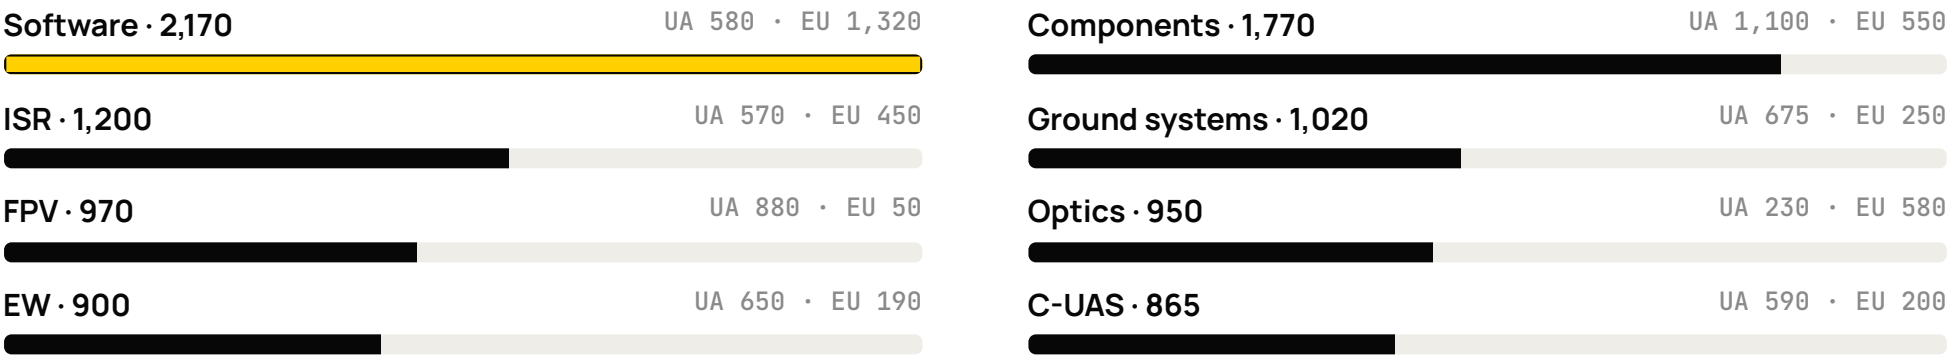

10,600+

product and system profiles

3

data layers: OSINT · HUMINT · expert

PRODUCTS BY CATEGORY

UA / EU — approximate split by manufacturer country

A working market-intelligence layer for your tasks.

YOU CAN

- Search companies, products, categories and segments
- Build market maps and thematic shortlists
- Compare by characteristics and TRL
- Find partners for a specific product
- Follow the media context around companies
- Use the findings in your internal work

WORTH KNOWING

- MCP returns data only within your licence
- An AI answer is an analysis tool: verify critical decisions
- Completeness depends on the company and open sources
- Verification, intros and trials go through the UNIT 117 team

A named licence — for your own work.

NOT ALLOWED

- Sharing the MCP URL or the account with third parties
- Posting the licence in documents, chats or channels
- Bulk export or reproduction of the base
- Training models on UNIT 117 data
- Reselling access or data

PRIVACY

We do not see your conversations

Your chats, files and conclusions stay between you and your AI. We see only the technical call your licence makes to the base — **exactly as much as data protection requires**. Personal contacts are not part of the base.

Your personal MCP URL is in the email.

We sent the URL together with this PDF. It is **named and works only for you** — keep the email and do not forward it.

YOUR PERSONAL MCP URL

`https://mcp.unit117.tech/••••••••/mcp`

Copy the URL from the email in full, with no spaces. If it has reached anyone else, write to your account manager and we will replace the key.

Three steps — a few minutes.

01

Developer mode

Settings → “Security / Sign-in” → turn on “Developer mode”.

02

New plugin

“Plugins” section → “+” next to the plugin search.

03

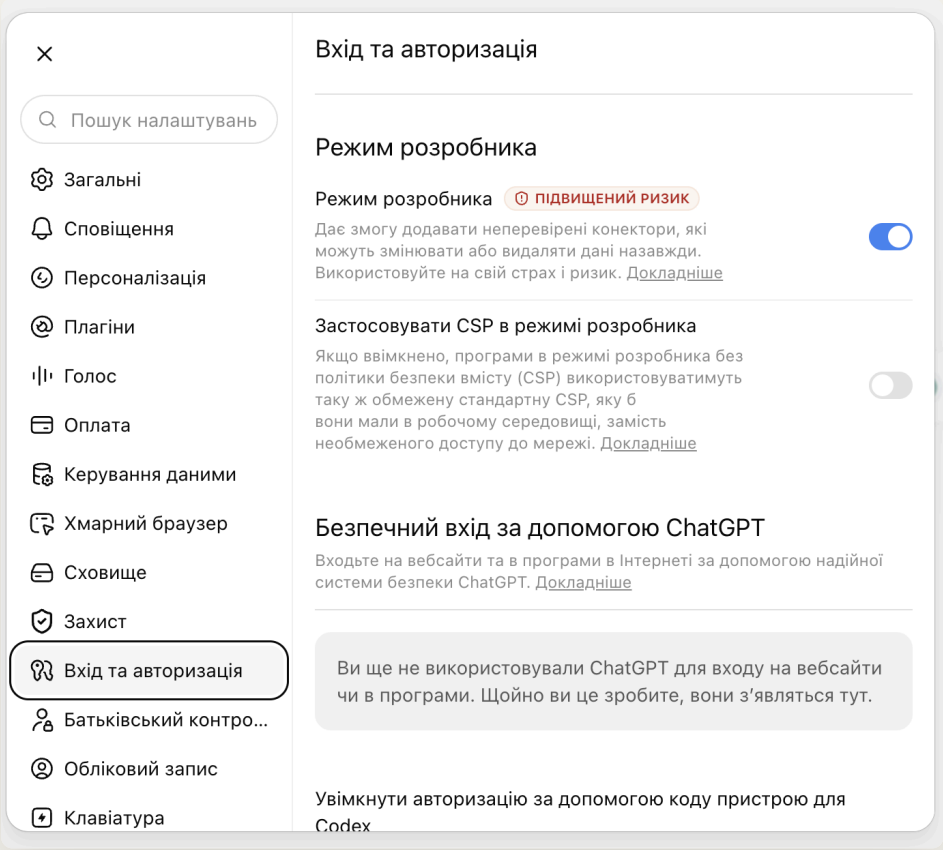

Paste the URL

Name UNIT 117, the URL from the email, “No authentication” → “Create”.

ChatGPT shows this standard warning for every custom MCP server. Screenshots show the Ukrainian interface; the layout is the same in English.

01 / Developer mode

Settings → “Security / Sign-in” → “Developer mode”

01 Open Settings

02 Go to “Security / Sign-in”

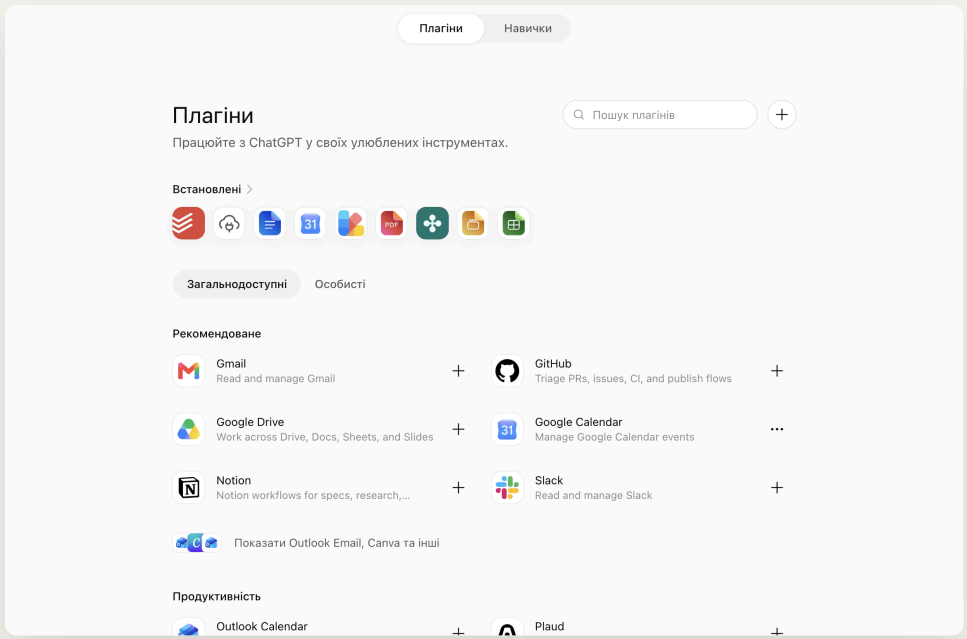

03 Find “Developer mode”

04 Turn the switch on

05 Go back to the “Plugins” section

02 / Plugins section

On the right, press “+” to create a new plugin

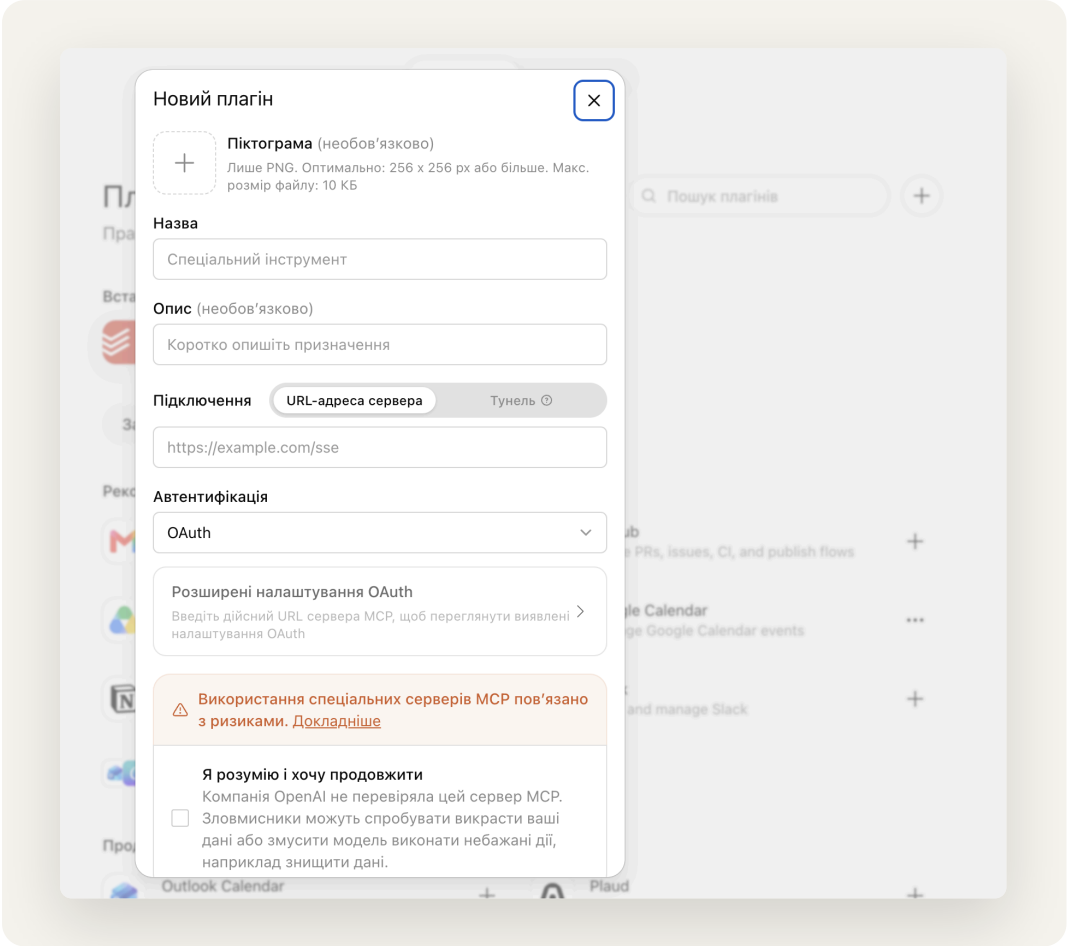

01 Open the “Plugins” section

02 Press “+” next to the plugin search

03 / New plugin

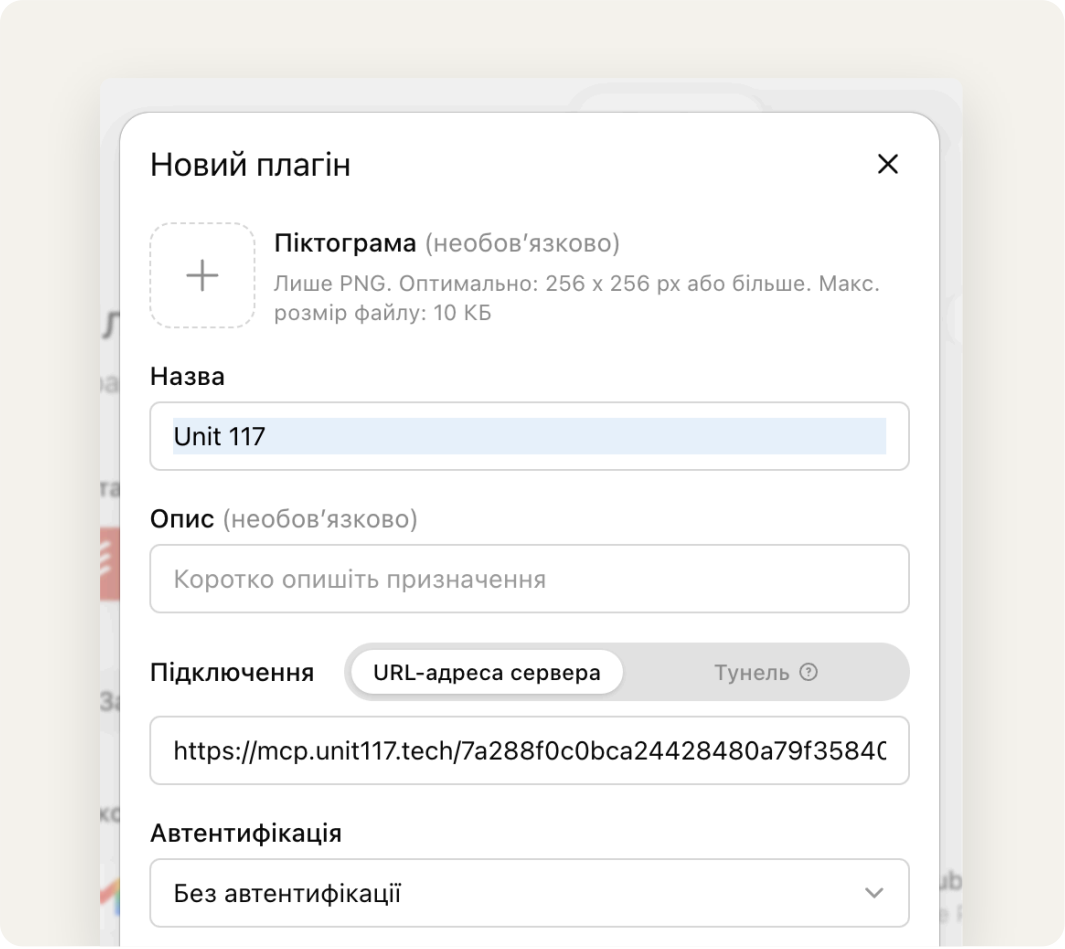

Fill in the name and connection

NAME	UNIT 117
DESCRIPTION	empty or Defence market intelligence
CONNECTION	Server URL
URL	your MCP URL from the email
AUTHENTICATION	No authentication

04 / Confirm

Check the URL and press “Create”

01 Name: UNIT 117

02 URL pasted in full, no spaces

03 Authentication: “No authentication”

04 Tick “I understand and want to continue”

05 Press “Create”

The same URL works in any MCP client.

CLAUDE

01 Settings → Connectors

02 Add custom connector

03 Name: UNIT 117, URL — from the email

04 Turn the connector on in a new chat

CURSOR AND OTHERS

01 Add a remote MCP server

02 Paste the same MCP URL

03 No authentication needed

04 Questions — write to your account manager

The key rule: mention UNIT 117 MCP in the request.

Without it, the AI may answer from general knowledge — fluent, but without the verified base. The phrase **"…in UNIT 117 MCP"** switches it from "the model's opinion" to data.

"Show me which UNIT 117 MCP data I can access"

"Find in UNIT 117 MCP companies in the C-UAS segment and group them by TRL"

"Compare in UNIT 117 MCP the Ukrainian and European optics market"

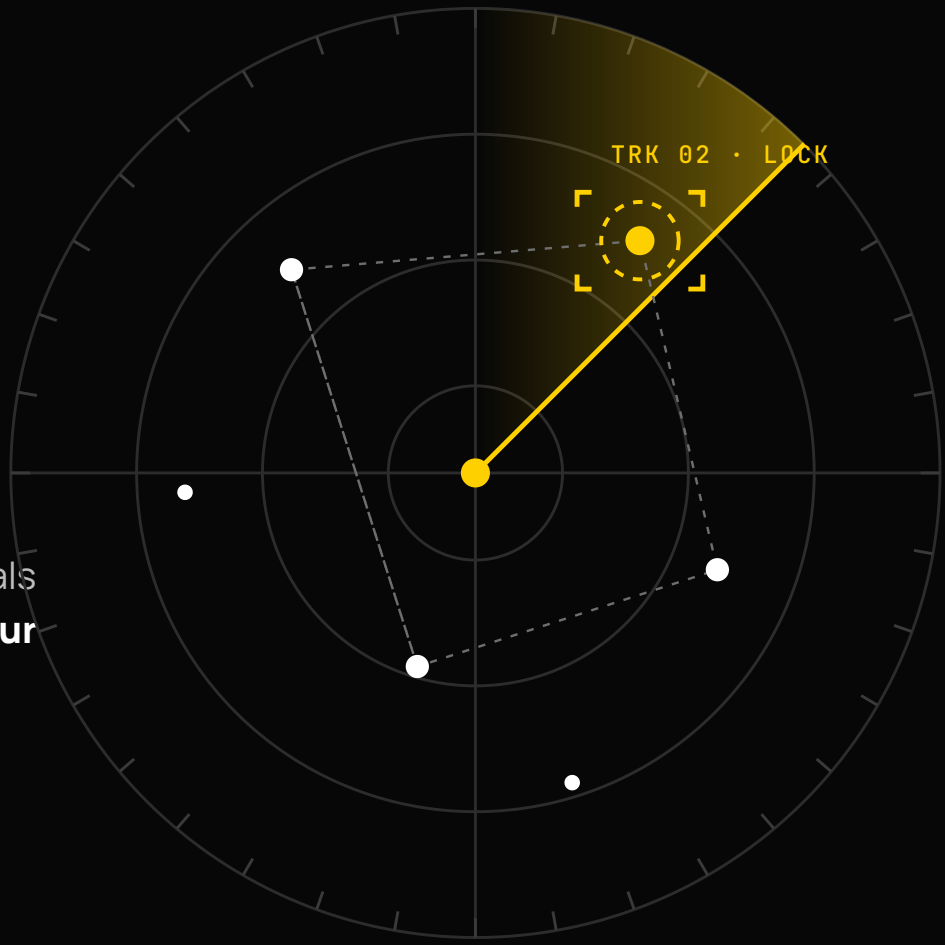

"Build in UNIT 117 MCP a shortlist of UGV makers with their products"

"Find in UNIT 117 MCP partners for my product in Ukraine"

"Show in UNIT 117 MCP the latest news on the companies in my list"

ACCESS READY

Ask the base yourself. Ask us the rest.

Your UNIT 117 account manager will get in touch to walk you through the details. Company verification, introductions, trials and research shaped around your question — **that is what our team does**.

Email	**info@unit117.tech**
Website	**unit117.tech/mcp.html**
